Logistics Management

Would you like to study at Darmstadt Business School?

Darmstadt is an “outstanding place of learning for sustainable development” according to UNESCO commission. So we can not blame you for wanting to study here.

Darmstadt Business School. What can I expect?

A Bachelor's Logistics Management degree from the h_da Business School provides the best basis for a promising career start. According to a Germany-wide ranking by “Wirtschaftswoche”, the h_da has been among the top ten selected by HR managers for many years.

Darmstadt Business School is known for:

- Practical orientation taught by lecturers with professional experience
- Learning and working in small groups
- The development of soft skills and general knowledge with integrated course options of society, culture and languages in every degree programme.

With our nine well-founded and practice-oriented degree programmes, we are currently preparing more than 2,300 students for their professional future and offer international students a broad variety of different business programs and modules.

The Darmstadt Business School has two main campuses in Darmstadt and Dieburg. Both are located right in the centre of Germany and in the economic heart of the Rhine-Main region. The campuses can be easily reached from the Frankfurt international airport with public transportation and offer a great starting location for weekend travels within Germany.

Program overview

The Bachelor of Science (B.Sc.) degree program in Logistics Management provides students with an understanding of the logistics processes involved in efficiently and sustainably managing the flow of materials and information from suppliers downstream to end customers, as well as the knowledge and skills they need to plan, design and optimize these processes. Graduates of the program are logistics specialists, who are nevertheless equipped with interdisciplinary knowledge, lean and project management skills as well as information technology know-how.

Our graduates take up careers in international businesses, with forwarders, manufacturers and suppliers, and anywhere else where managing the flow of materials, analyzing outbound and inbound processes and skilled team management is needed. The B.Sc. degree also gives you the option of pursuing a Master's degree in Supply Chain Management/ Logistics to further expand and deepen your knowledge.

Key facts

Program	Logistics Management
Duration	3 Years
Form of Study	Full Time
Degree	Bachelor of Science
Language	German with some English modules
Campus	Dieburg (mainly) and Darmstadt
No. of students	Approx. 80 students per year
Start	October

Program structure

The curriculum includes seminars, lectures, field trips as well as project work and practical experience. The basics modules in the first four semesters will give you a strong foundation in core disciplines a well-versed logistics manager has to master: economics, accounting, procurement, production, distribution, project management and foreign languages. The advanced study modules will give you an opportunity to enrich your study experience by different perspectives: lean management, ERP systems, logistics lab, operations research and transportation law.

Modules for international and exchange students

As an international student you can choose to study the full B.Sc. Logistics Management program or spend one or two semesters as an exchange student with us. As an exchange student you can select different English-taught business modules from the B.Sc. Logistics Management program or any other B.Sc. program in the winter and the summer term. You can find an overview on our webpage under the individual study program.

Also, we are offering intensive German language modules (4 credits), semester-long German modules (2.5 credits) for all levels as well as interdisciplinary modules i.e. Engineering Ethics, Digital Emotions, European Identities for all international students (2.5 credits) during the winter and summer semester.

Previous education. What is required?

The Logistics Management degree program is subject to limited admission (NC).

The following school-leaving qualifications, among others, apply as admission requirements:

- General higher education entrance qualification
- Subject-specific higher education entrance qualification valid in Hessen
- Entrance qualification for a university of applied sciences valid in Hessen

Application. How do I get to h_da?

The program begins in the winter semester. All information on the application procedure is available at <https://international.h-da.de/en/your-stay-at-h-da/international-exchange-students/why-choose-h-da/how-to-apply>

Advice for international students. Where can I get more information?

The first point of contact for most questions about your studies is the International Office (IO). In addition to study advice and information on the details of the application procedure, advice on the organization or financing of studies is also available at the IO. incoming.int@h-da.de
